

Staircase Design, Made for You

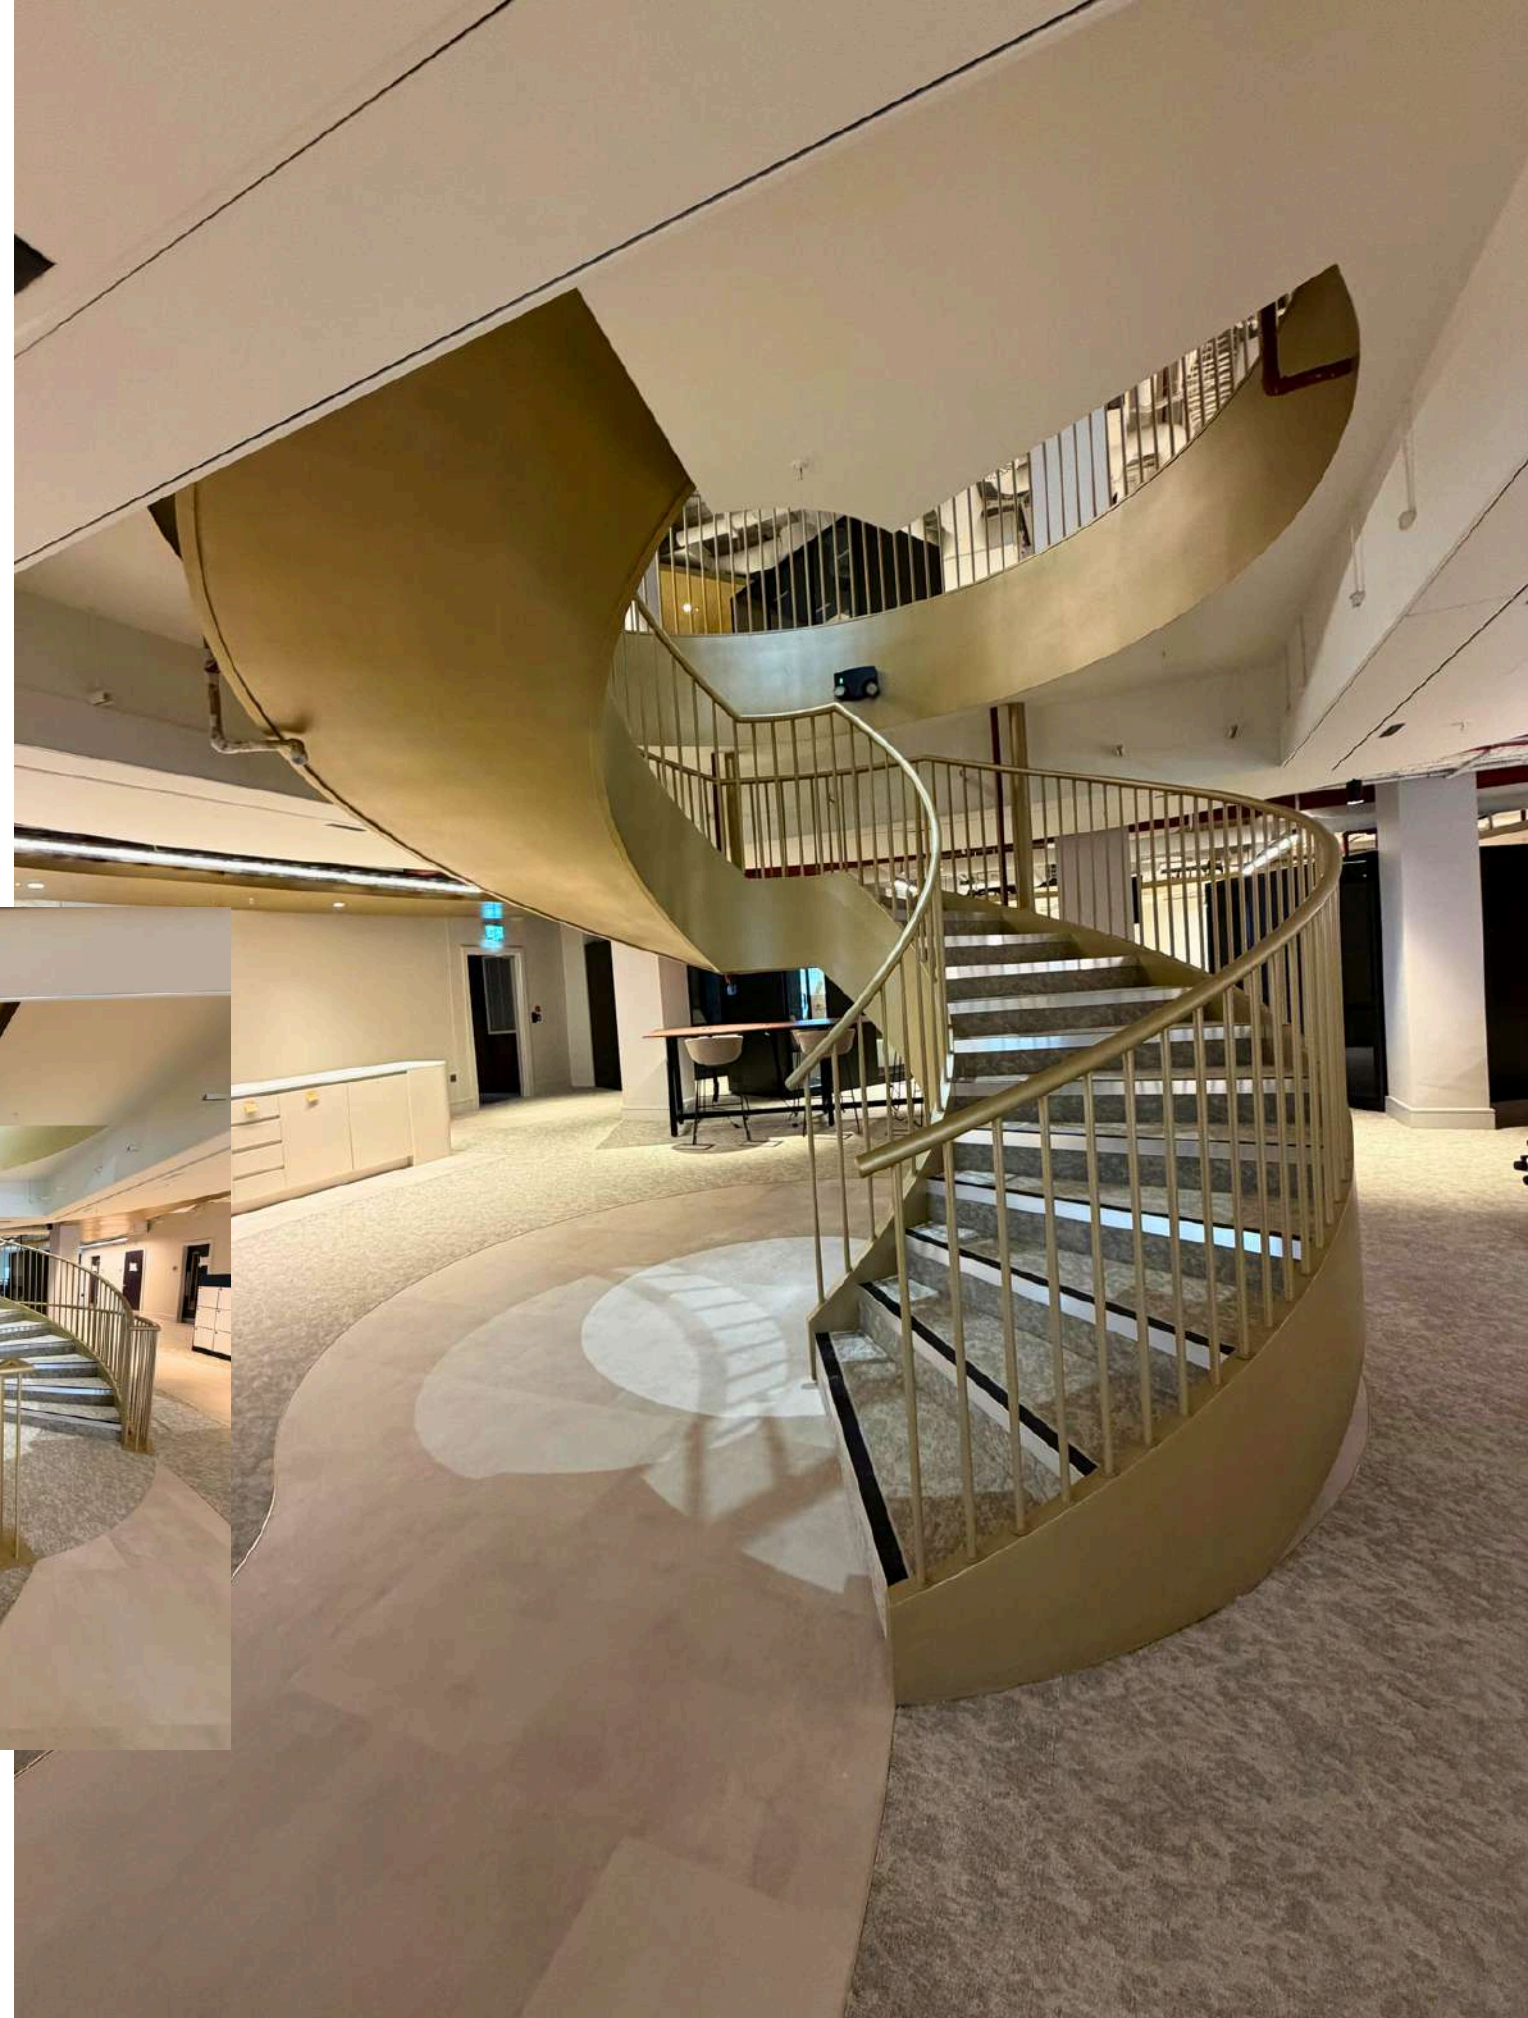

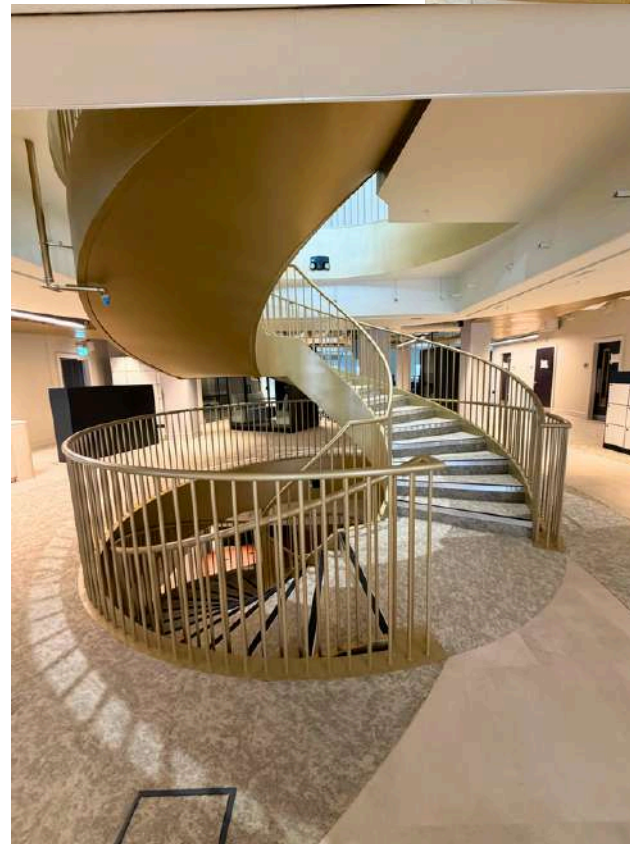

Working with an experienced staircase designer should feel exciting - not overwhelming. At DDC London, we guide you through every step of the process, from initial concept to final installation, keeping you involved and inspired along the way.

We offer a complete, all-in-one service so you never have to coordinate multiple contractors or compromise on your vision. Our team handles everything, with your approval at every stage.

Exceptional Design, Accessible to All

For too long, beautifully crafted staircases have been out of reach for private homeowners — reserved for large architectural projects with equally large budgets. We founded DDC London to change that.

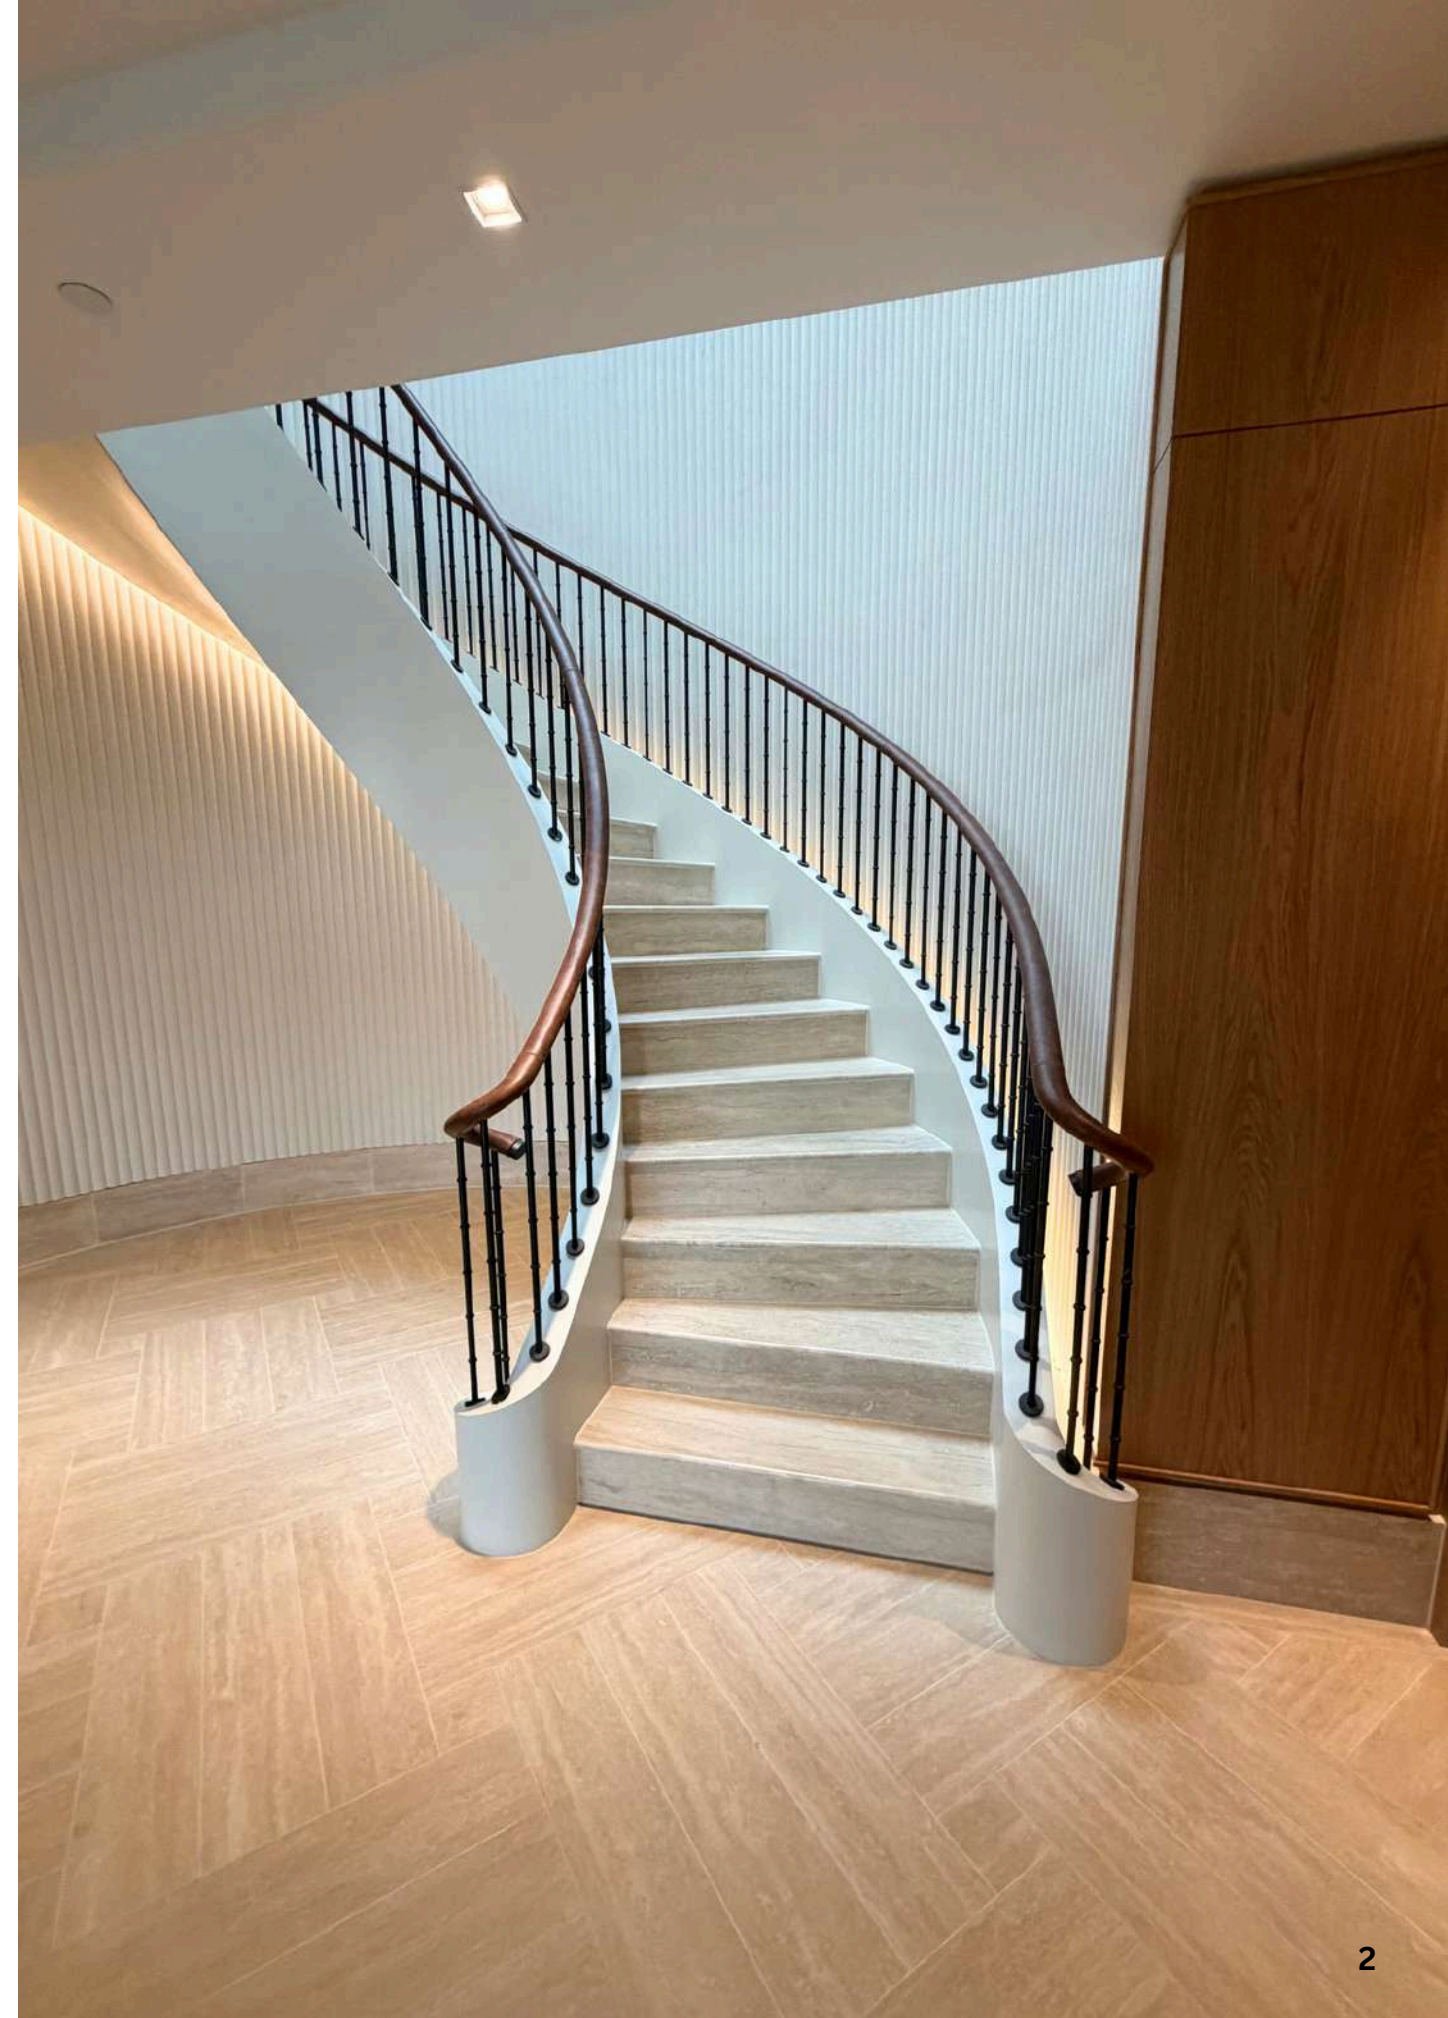

We believe every home deserves outstanding design. That's why we've made it our mission to bring high-quality, bespoke staircase design to residential and private customers — with the same level of craft and care you'd expect from a premium architectural practice, at a price that makes sense for you.

Bespoke Staircase Designs

At DDC London, we specialise in bespoke staircase designs. Our designers work closely with you to explore combinations of materials, structures, and concepts, bringing your dream staircase to life. Whether for new builds or renovations, our custom staircases add a touch of elegance and sophistication to any space.

Our Process

- 1. MEET YOUR DESIGNER** Once you have decided to go with us, contact our office for a quotation by sending an email to sales@ddclondon.co.uk. The quotation based on cad/PDF drawings and sketches you have provided to us depending on the model you like.
- 2. PRECISION SURVEY & CAD DRAWINGS** We carry out a detailed survey of your space and produce precise CAD drawings to ensure every measurement and detail is exactly right before anything is manufactured.
- 3. DESIGN PROCESS** Our design team begins conceptualising and visualising your staircase. Detailed designs are presented to you for review and final approval before manufacture begins — nothing moves forward without your sign-off.
- 4. EFFORTLESS INSTALLTION** We handle everything through to a seamless, professional installation.
- 5. LASTING QUALITY AND GUARANTEE** Our commitment doesn't end at installation. Every staircase we deliver is built to last, backed by our quality guarantee and the pride we take in every project we complete.

New Staircase Designs and Innovations

A staircase is more than a way between floors — it's one of the most powerful design statements a home can make. Our specialist team works closely with you to design and install a staircase that is entirely your own, combining your chosen elements, materials, and vision into something that commands attention and stands the test of time.

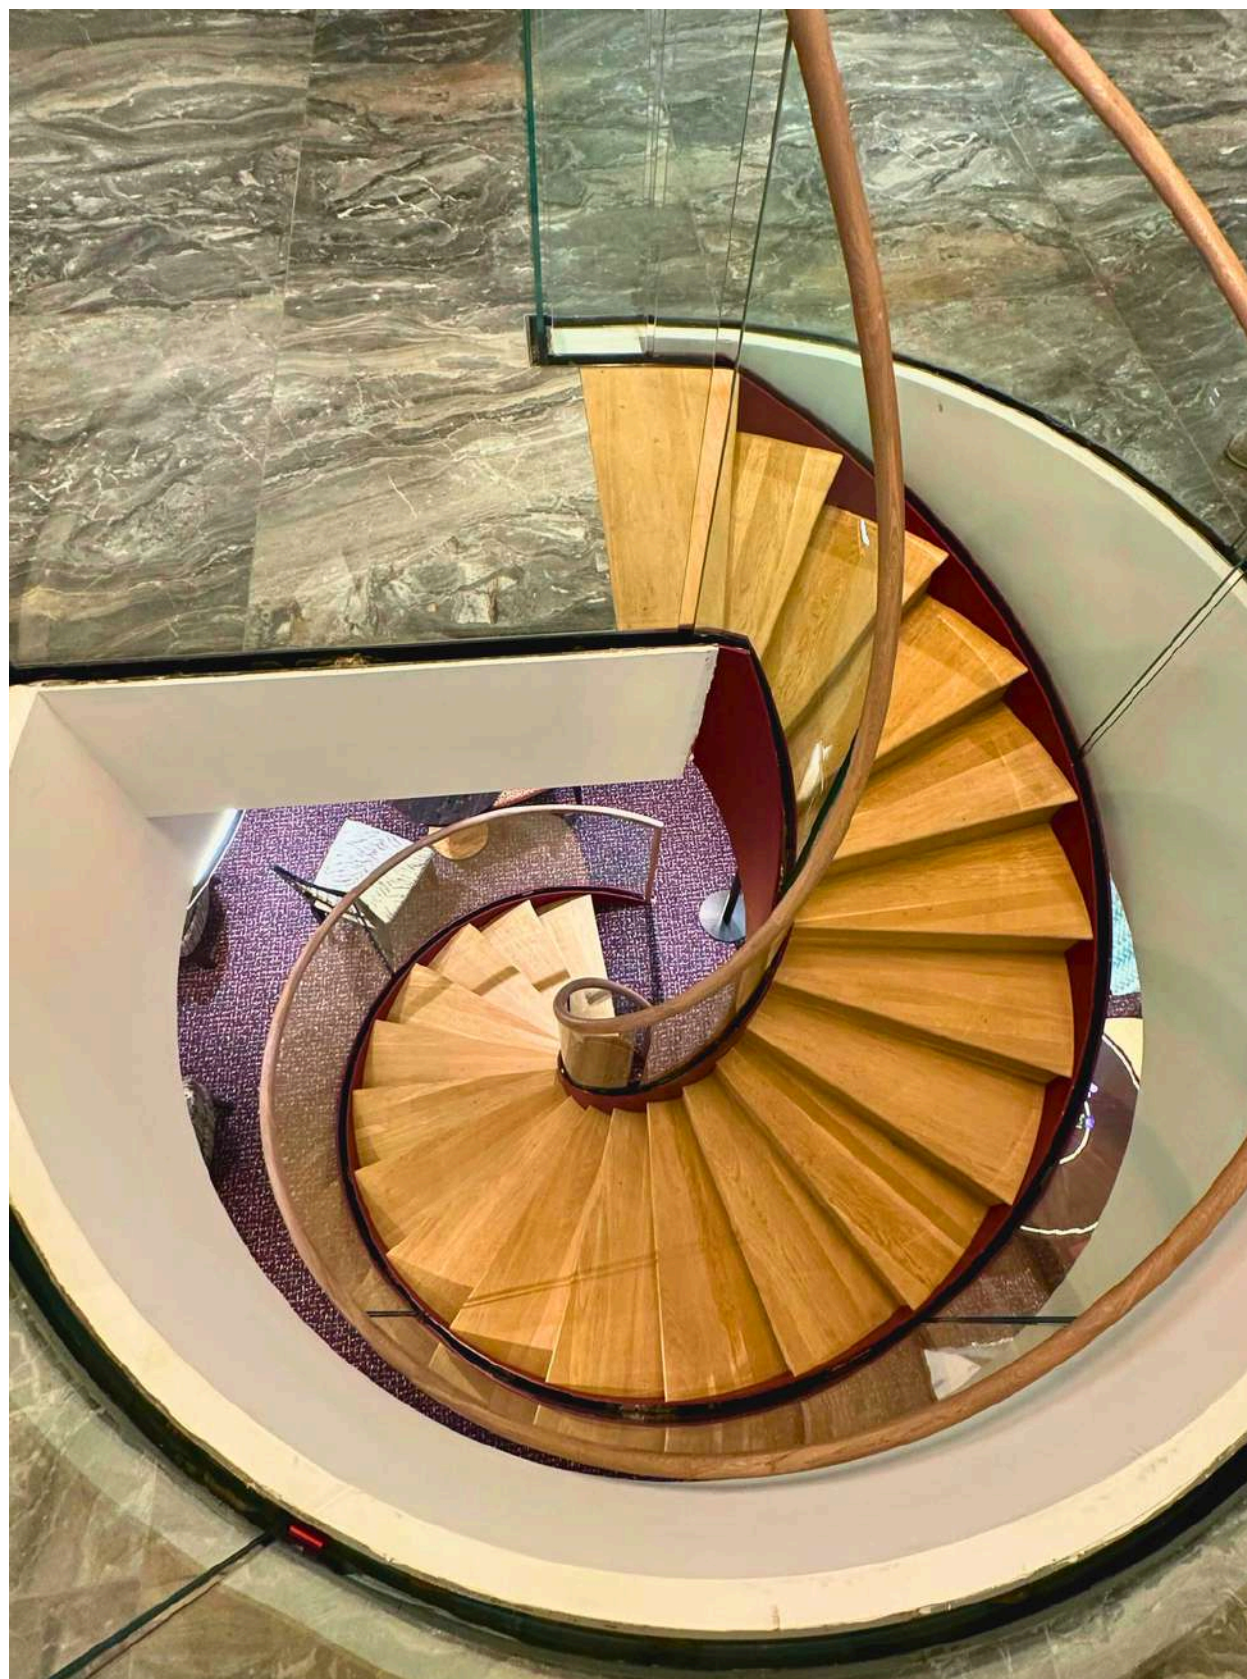

Staircases as Individual as Your Home

Every staircase we create is a one-of-a-kind piece of functional art — designed with intention, crafted with precision, and tailored to feel as though it could only ever belong in your space.

MODEL

Helical

The helical staircase is among the most breathtaking structures in contemporary interior design. Sweeping gracefully through space without the need for a central column, it offers a sense of fluid, uninterrupted movement that is as sculptural as it is functional — a true centrepiece for any home.

MODEL

Curved

The curved staircase is defined by its stringers — the structural components that trace a helical or spiral arc to support each tread and riser. It is this graceful, sweeping form that gives the curved staircase its unmistakable presence, turning a functional element of the home into something genuinely extraordinary.

MODEL

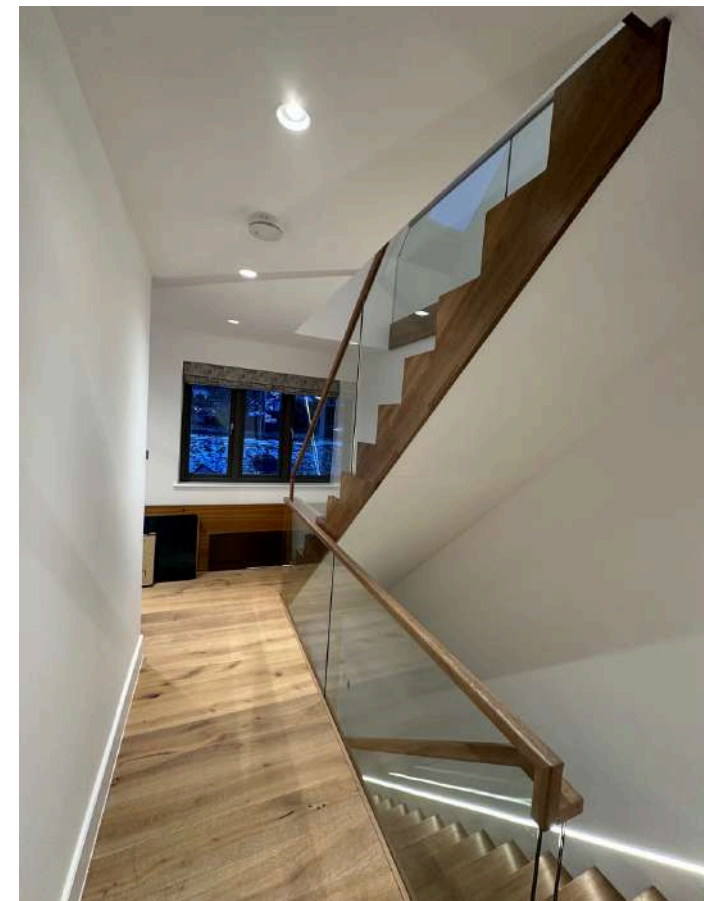

Close

Among our collection, the Close is a testament to the enduring appeal of simplicity. Rooted in traditional construction, this design is defined by its closed treads — a detail that brings a natural sense of warmth, solidity, and security to any home.

What makes the Close truly special is its versatility. With a wide range of materials, styles, and finishes to choose from, every staircase is tailored to feel like it was made for your space — because it was.

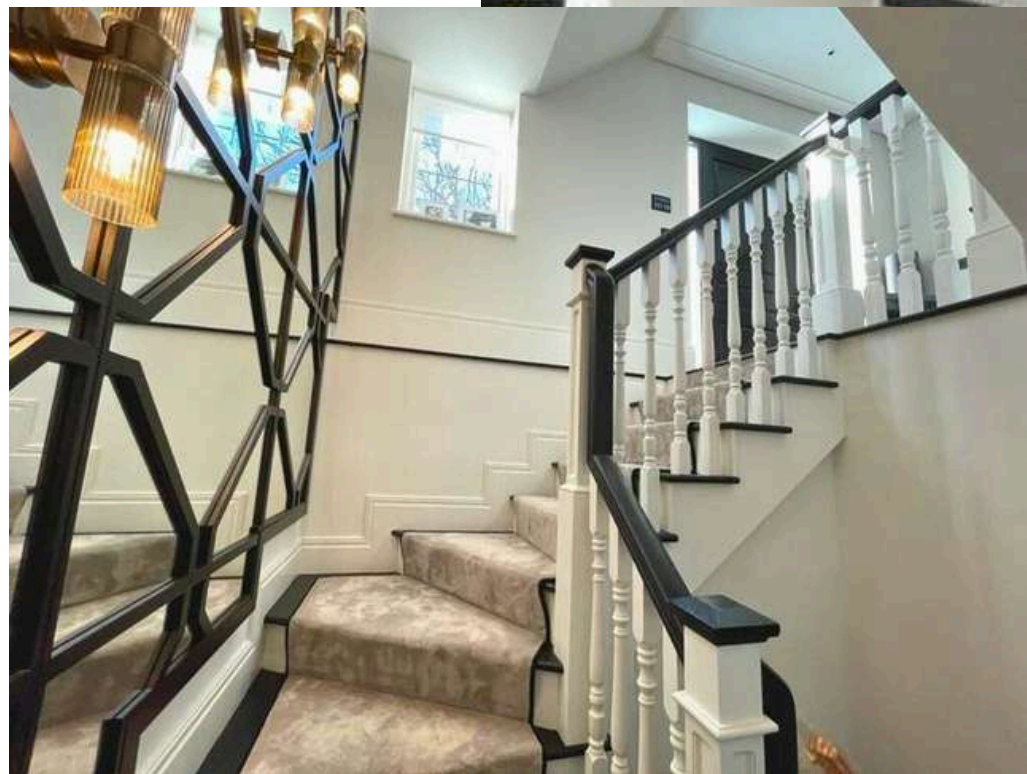

MAKE A LASTING IMPRESSION

Traditional construction and intricate detail are not mutually exclusive. The Close staircase is proof of that — a design that honours classic craftsmanship while offering a wealth of personalisation options to make it entirely your own.

Adaptable to virtually any layout and space, the Close is as practical as it is beautiful. It's no surprise it remains one of our most sought-after designs, trusted by homeowners across a wide range of properties.

MODEL Timber

There is a reason timber has remained a staple of staircase design for centuries. Its warmth, natural beauty, and rich grain make it one of the most versatile and enduring materials available — equally at home in a rustic countryside retreat as it is in a sleek, contemporary residence.

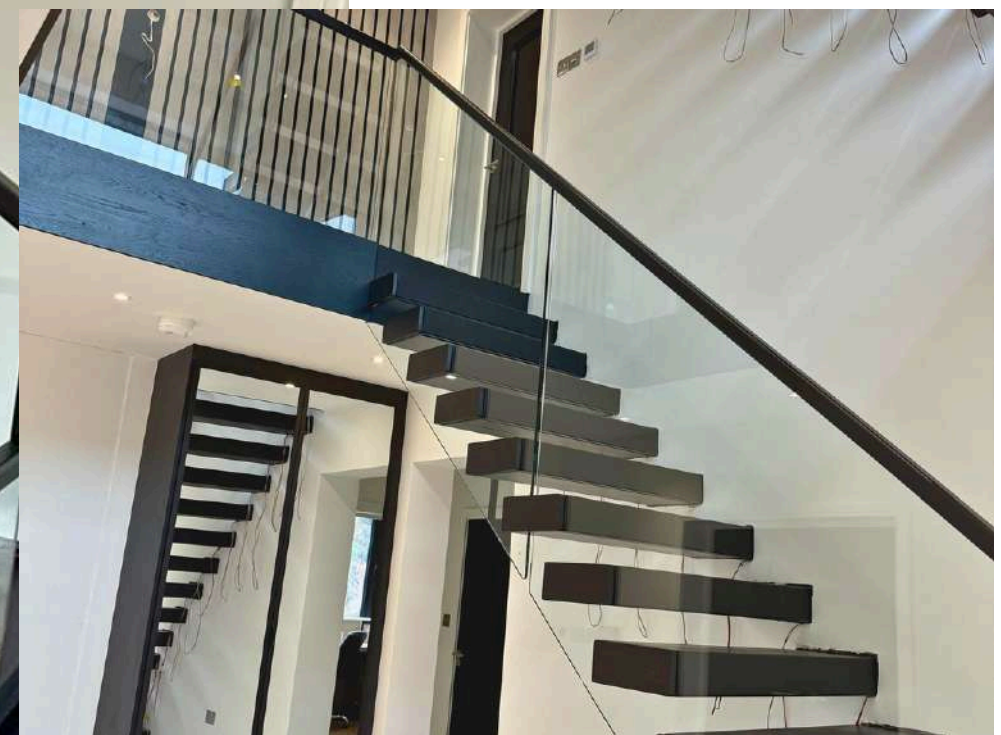

MODEL

Open

Let the light in. Our open plan staircase designs are crafted to transform your entrance or hallway into a bright, airy space that feels effortlessly larger than it is.

With open treads and clear glass balustrades working in harmony, natural light flows freely through every level of your home — creating a sense of openness and flow that a traditional staircase simply cannot match.

MODEL

Zig-Zag

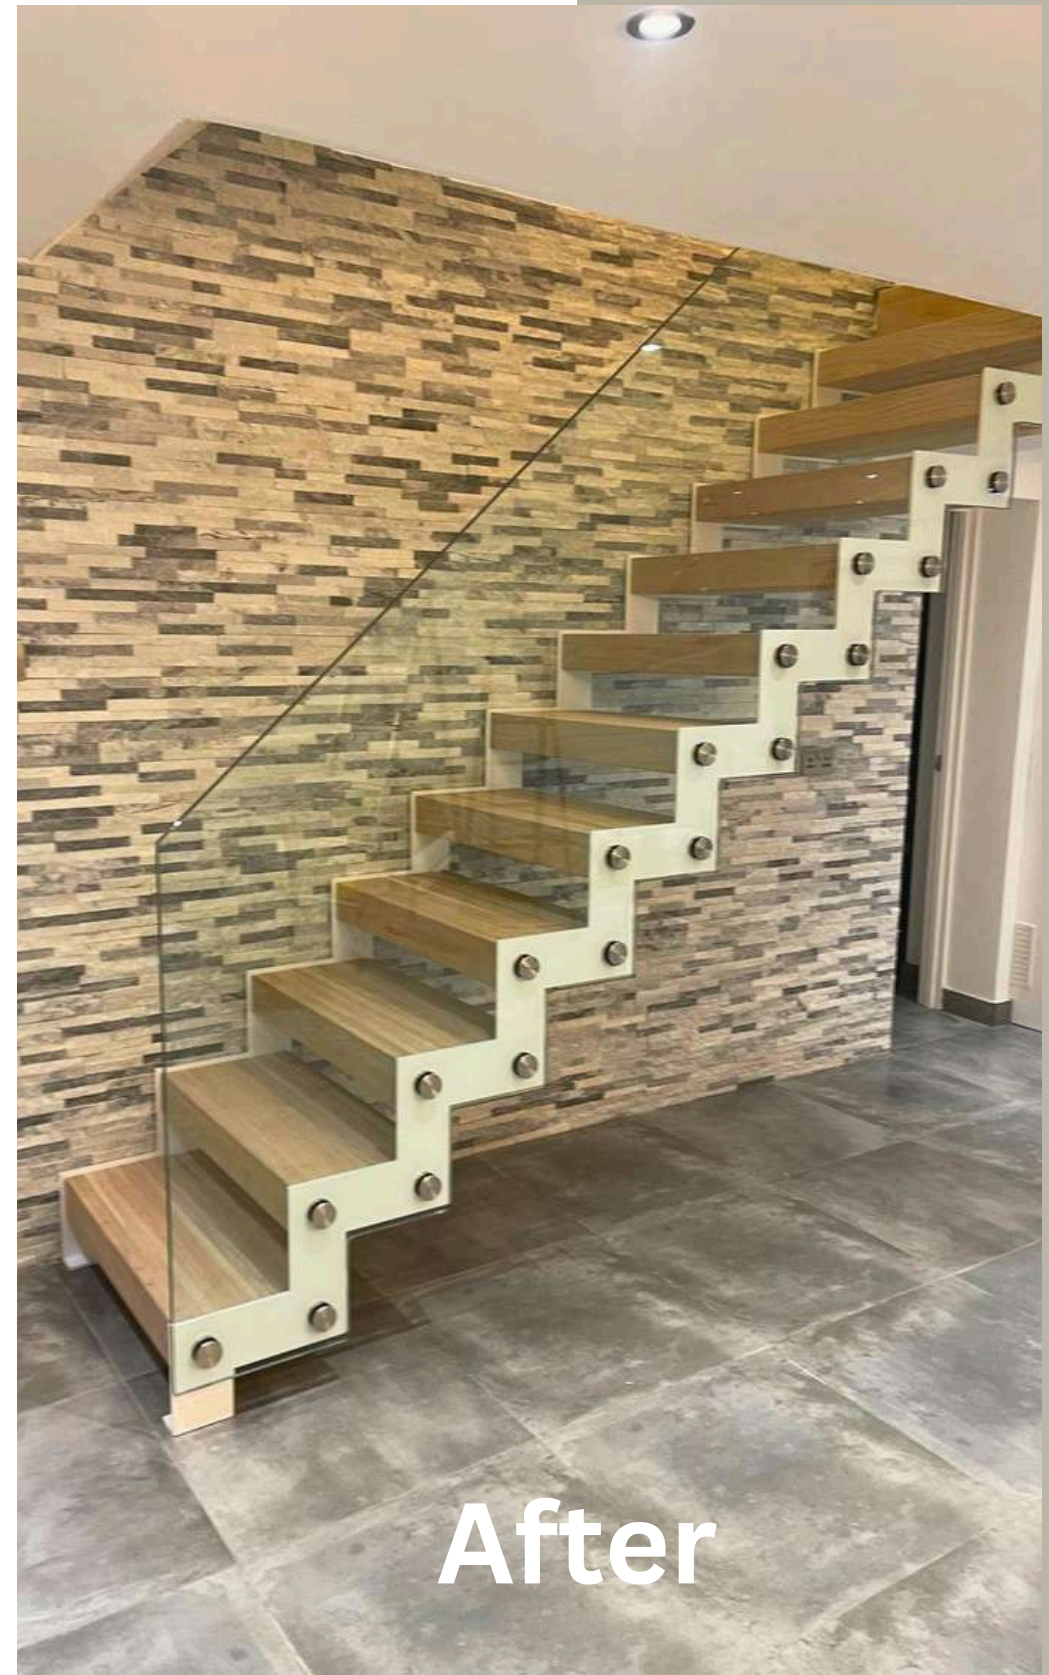

Bold, sculptural, and unmistakably modern. The Zig-Zag staircase is as much a work of art as it is a functional structure — its continuous angular form creating a striking visual rhythm that commands attention the moment you enter a room. Available in metal, wood, and concrete, each material brings its own distinct character to the design. Whether you're drawn to the industrial edge of steel, the natural warmth of timber, or the raw sophistication of concrete, the Zig-Zag adapts beautifully to your vision.

Before

After

MODEL

Floating

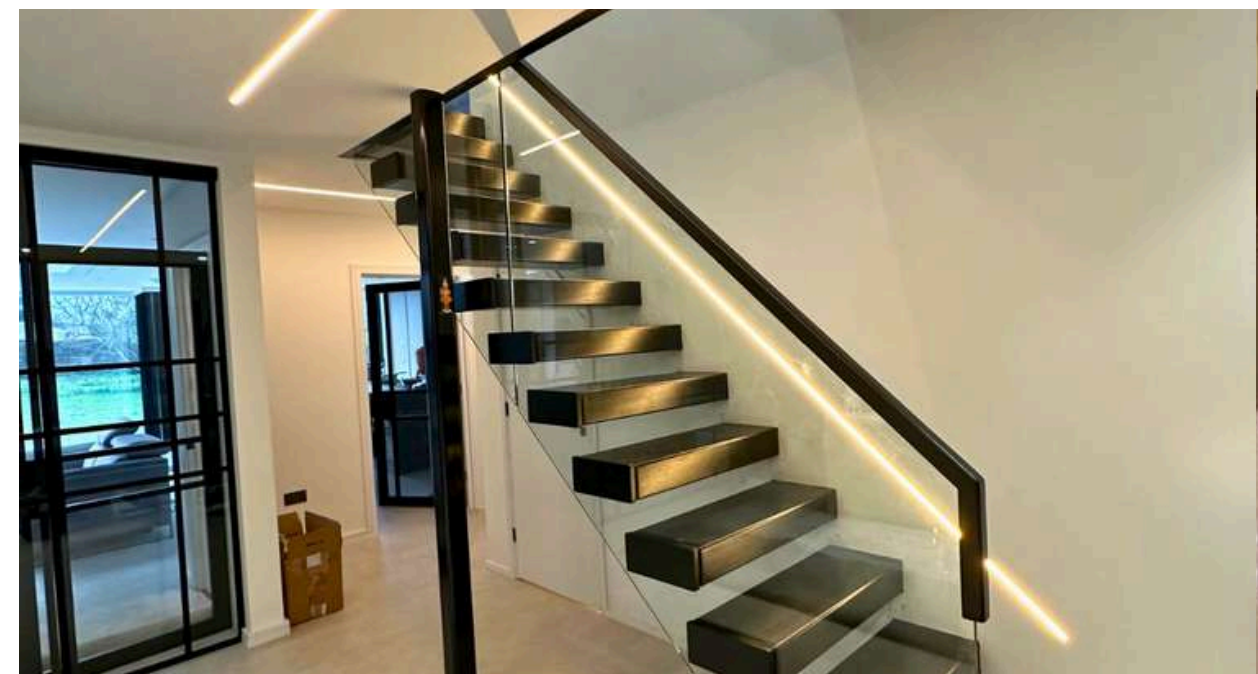

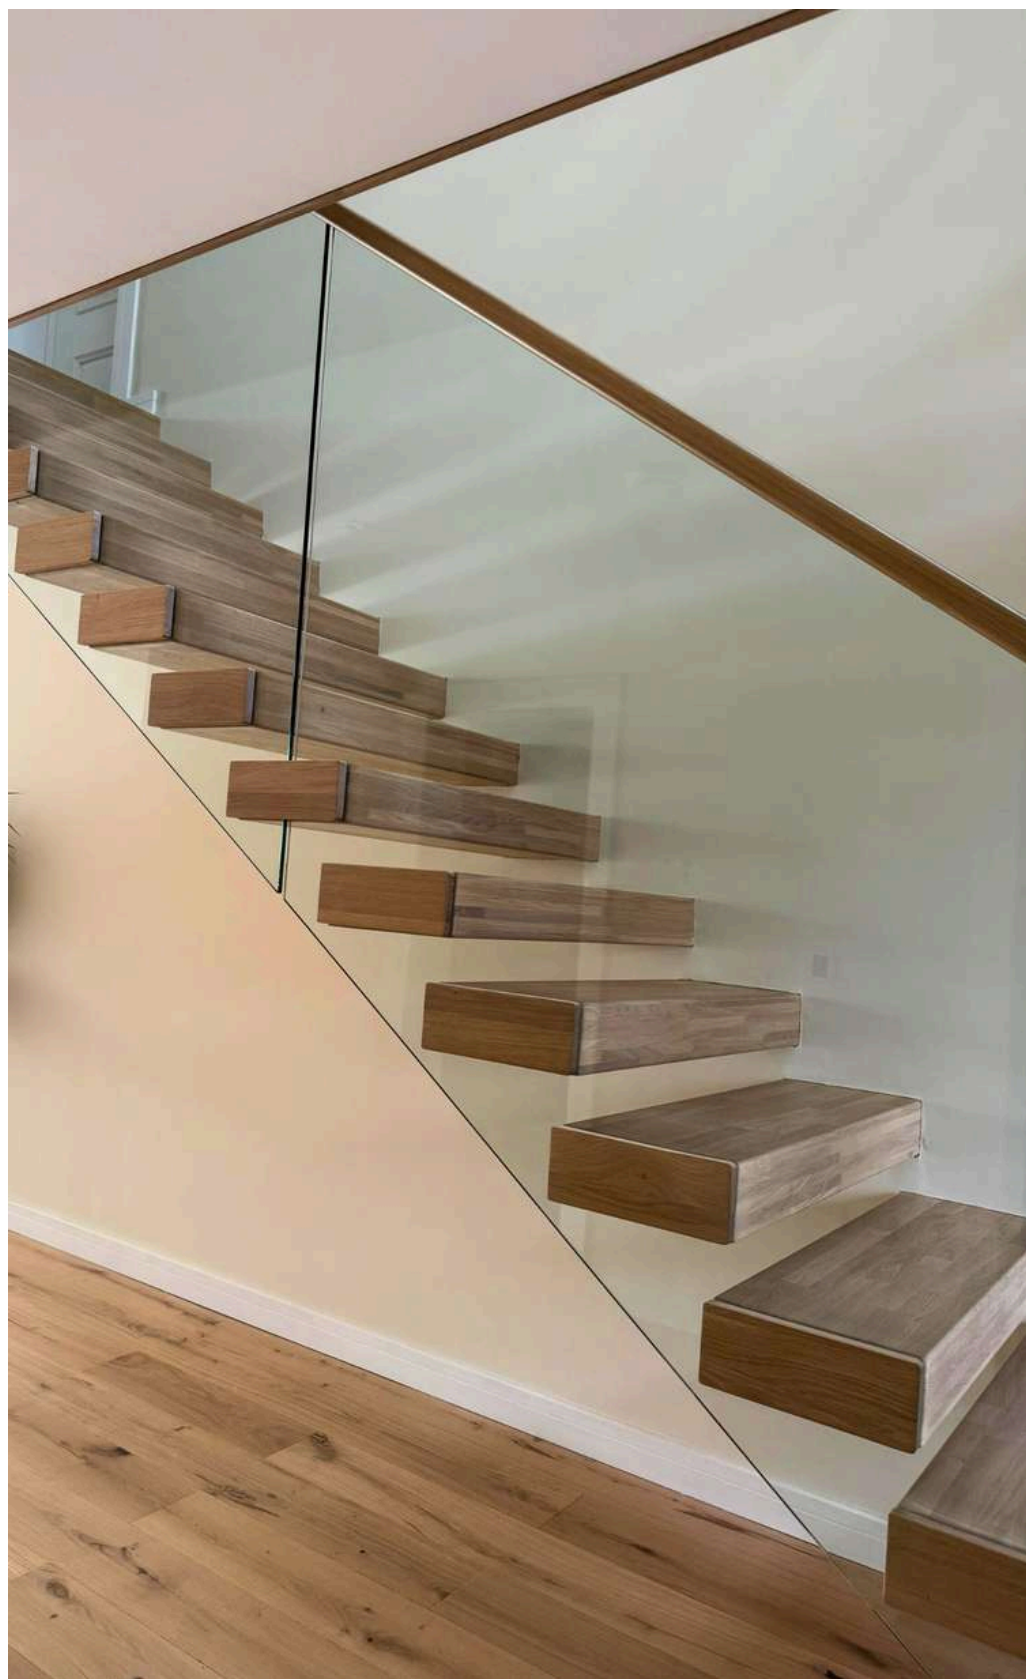

Few design statements are as powerful as a floating staircase. Also known as cantilevered, these designs carry an air of quiet drama — each tread appearing to suspend effortlessly in mid-air, unencumbered by visible supports or bulky structures.

The result is a staircase that feels as light as it looks. Clean, minimal, and architecturally refined, the Floating staircase doesn't just connect two floors — it becomes the defining feature of the space around it.

Custom End Grain & Embedded Detail

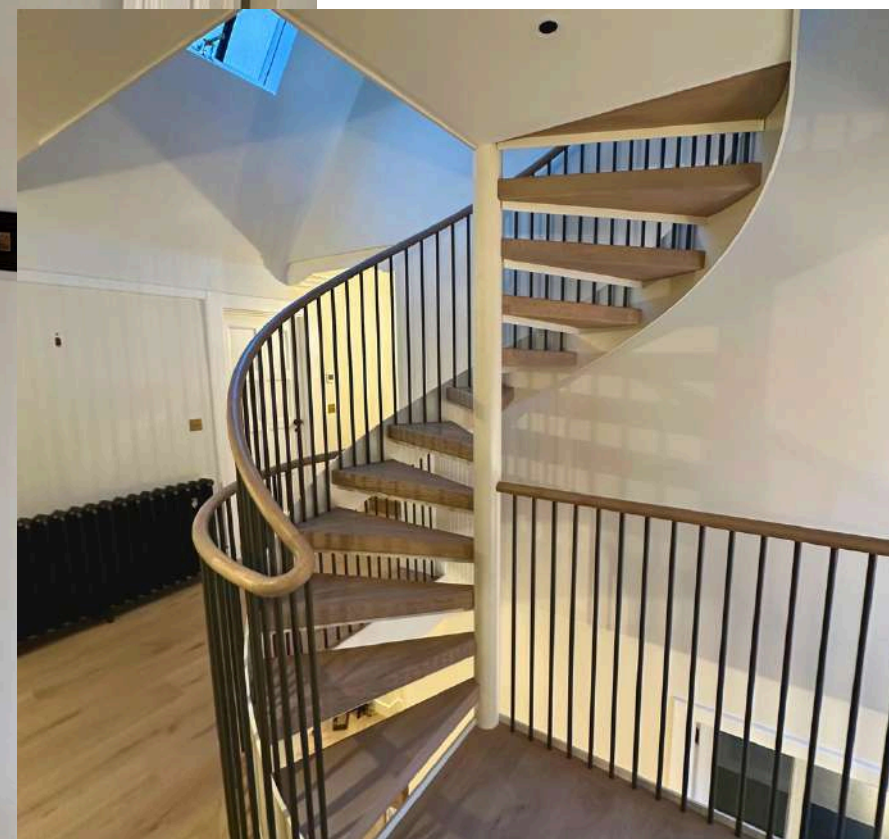

The difference between a beautiful staircase and an extraordinary one often lies in the details. Our custom embedded glass finish is a signature touch that sets DDC London staircases apart — crafted by producing extra treads and bespoke end caps to achieve a finish that looks and feels entirely seamless.

MODEL

Spiral

She spiral staircase is one of architecture's most iconic structures — a design that has graced everything from grand historic residences to cutting-edge contemporary projects, and never once fallen out of favour.

UNLIMITED BESPOKE STAIRCASE STYLES

Strength and style, without compromise. Our metal staircases are designed for spaces that demand both — built from premium, heavy-duty materials that are engineered to withstand the rigours of high-footfall commercial and office environments, without ever sacrificing aesthetic appeal.

Are you looking for something different? Call our team to discuss your ideas today.

FIVE STAR REVIEWS

UNBEATABLE SERVICE

Each of our clients receives top-quality products and exceptional service. Every personal journey with us culminates in a five-star review. We often visit our clients for a coffee and to admire the finished work while we're on the road.

Client Reviews

We are absolutely delighted with our new staircase... Really high quality, beautifully designed and precision manufacture/engineering and install. The company was really quick - 6 weeks or so from initial contact to install - for an original, unique design. Great team of people - architect, engineer/designer, installation.. was a pleasure to have them working in our home. Wish all companies were as good as this....

anthony graham

The team at DDC are excellent. From when I was first introduced they helped design and procure our signature staircase. We had some teething issues but their attention to solving these was spot on. Wouldn't hesitate to recommend to anyone. Thank you for making my house a home.

Acorn2Oak Property Advisors

Best work ever for my house..after requirements i gave for the internal stairs everything was executed as expected on time

Fabio Panichella

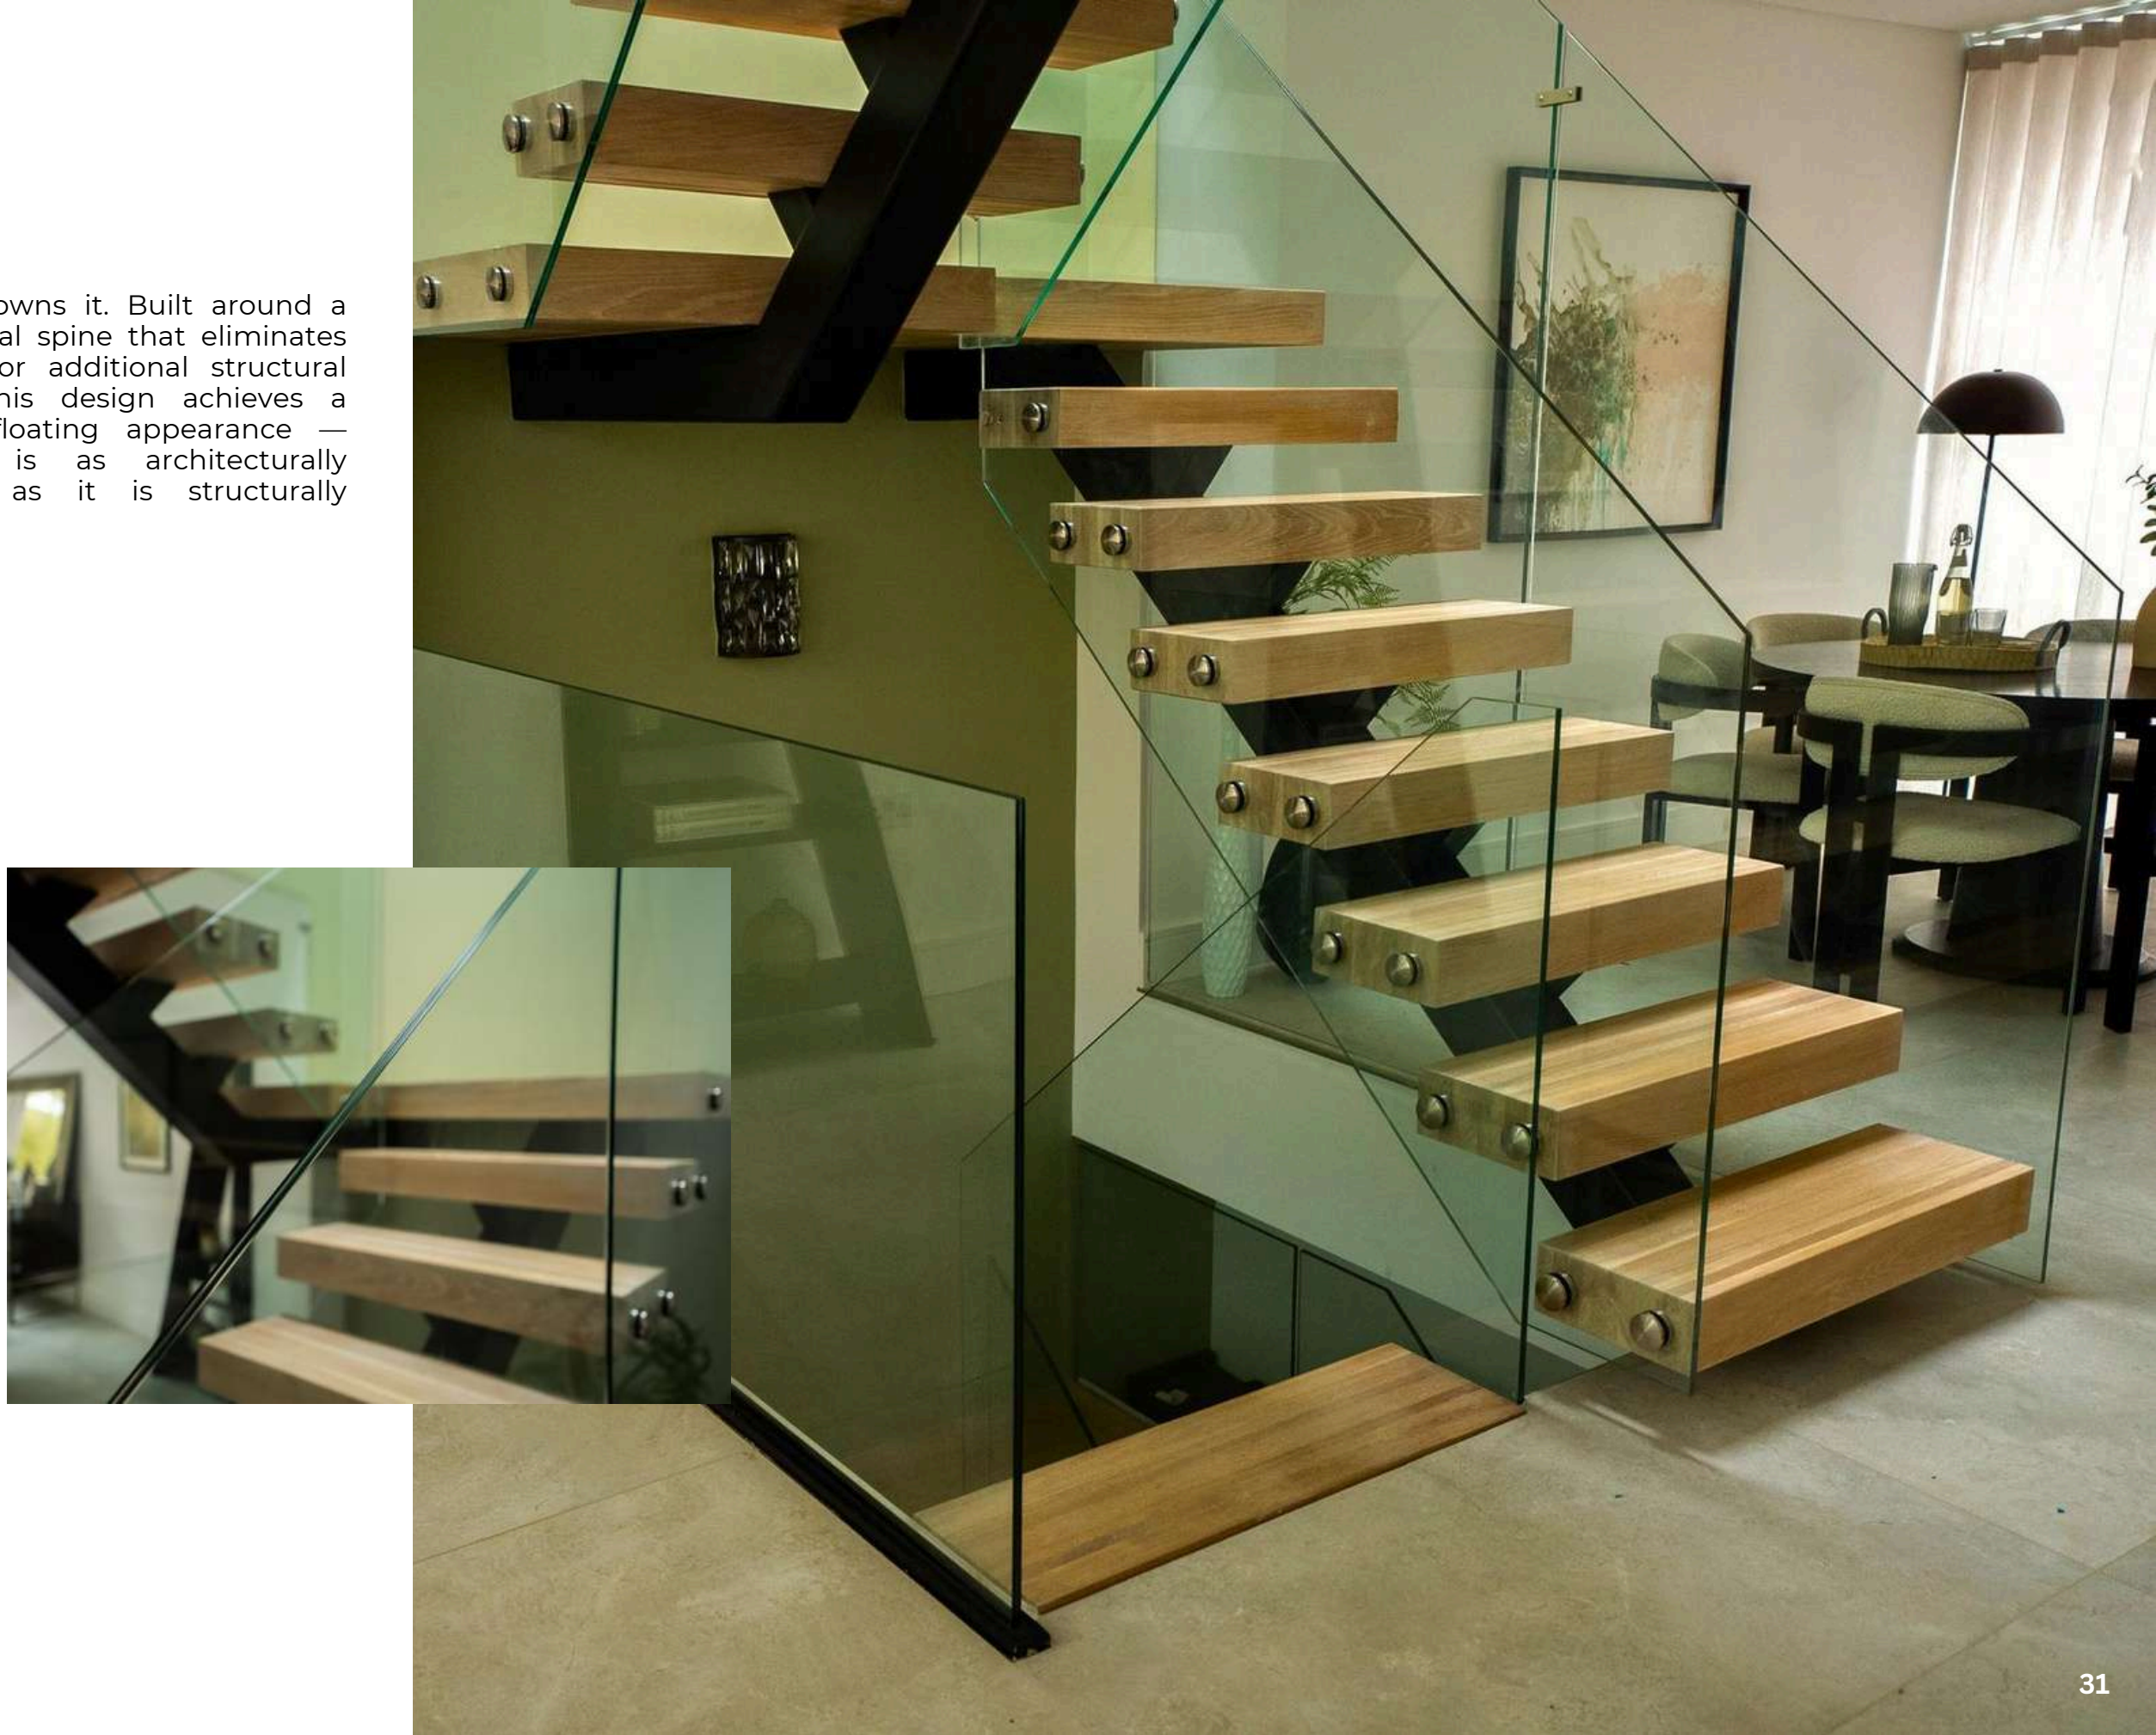

MODEL

Spine

The Spine owns it. Built around a single central spine that eliminates the need for additional structural supports, this design achieves a genuinely floating appearance — one that is as architecturally impressive as it is structurally ingenious.

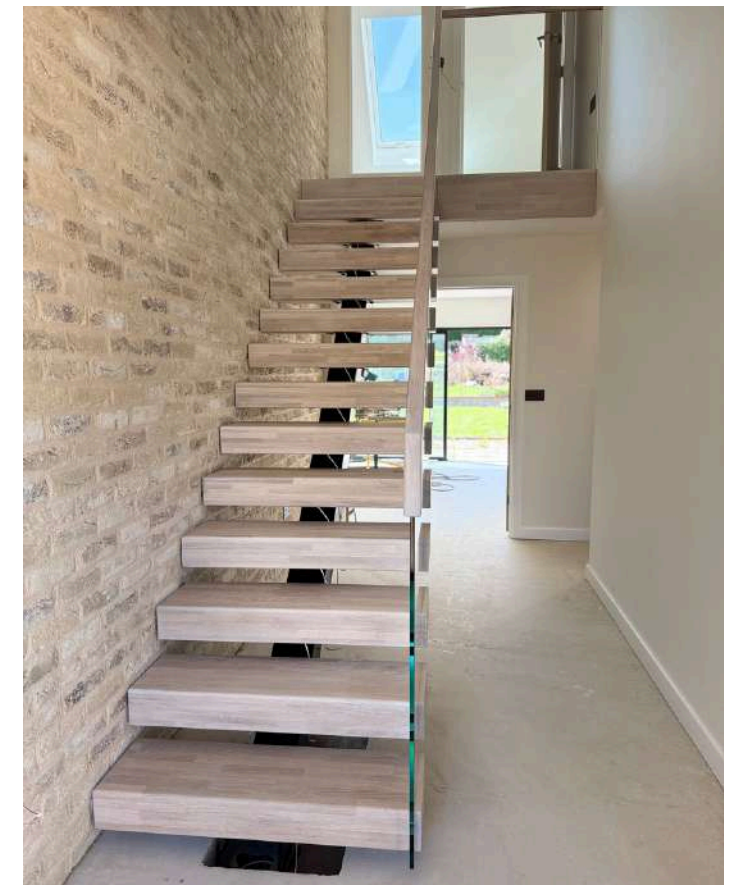

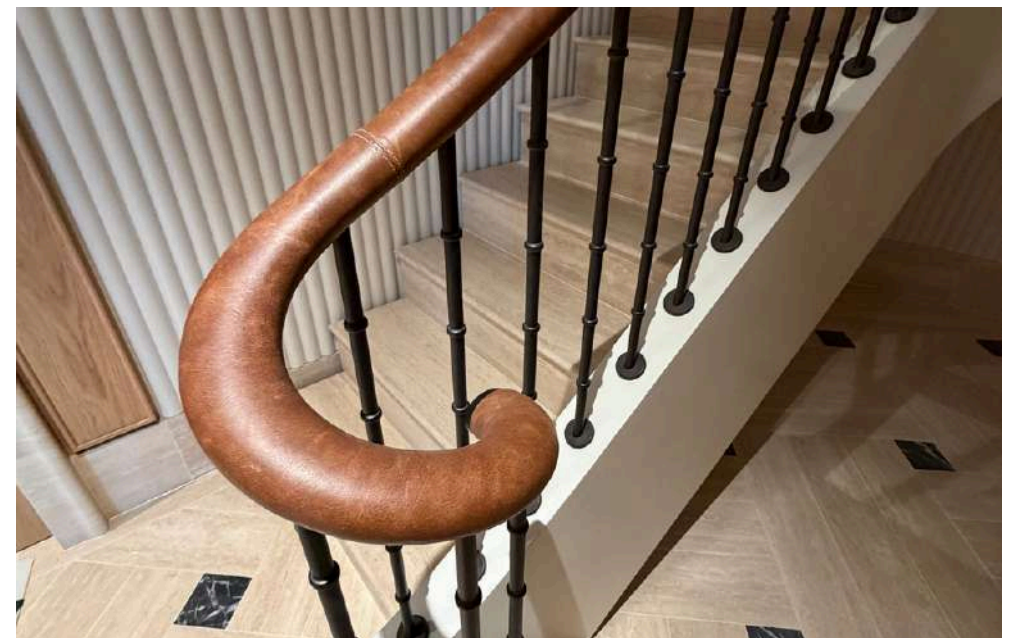

OUR MOST VERSATILE DESIGN

Every staircase we create is a unique, bespoke piece — functional by necessity, beautiful by design. No two projects are the same, and that is precisely the point.
